EXPERIENCE

Mini Projects

LOCTOGLOB / *HTML , CSS , JS , Python (Flask) , MongoDB Atlas*
- Developed a web application enabling users to log in via Gmail authentication with email verification for first-time signups.
- Integrated Serveo and Ngrok to enable port forwarding, allowing users to expose their localhost websites globally.
- Designed a user-friendly interface with step-by-step instructions for downloading, running, and using Serveo and Ngrok.
- Implemented session management and sign-out functionality to enhance security and user experience.
- Project Source Code

AUTOREM / *Sendgrid , UIPath*
- Developed an automation tool using UiPath that logs into the college website, auto-fills credentials and CAPTCHA, and scrapes assignment details.
- Used OCR and image processing techniques to extract assignment details from the portal and structure them into a tabular format.
- Integrated SendGrid's API to schedule automated assignment reminders, ensuring timely notifications a day before the deadline.
- Designed an end-to-end automation pipeline that eliminates manual tracking of assignments, improving efficiency and accuracy.
